

Insert as an Additional Taxa For *Cordia boissieri*.

***Cordia sebestena* L.**
(*Sebesten sebestena*)

Geiger Tree

- C *Cordia sebestena* is also known as Anaconda, Broadleaf Cordia, or Joaquiin; Geiger Tree is popular in coastal landscapes in tropical climates, USDA zones 10b(10a) to 11, and is sometimes encountered in the lower Rio Grande Valley and Florida; plants form small 10Nto 20N evergreen trees, where cold temperatures do not result in periodic dieback.
- C The flowers of *C. sebestena* are similar to those of *C. boissieri*, but are bright orange in color; its high degree of salt tolerance allows it to be used closer to the dunes than many ornamental trees.
